

Barrow, Alaska Scenery for FSX

by: Scenery4FlightSims.com

This is fictional scenery for Barrow, Alaska (PABR), designed for FSX.

I created this scenery to update the airport and surrounding area and replace several of the unrealistic looking buildings with something more appealing.

Here is what to look for in this scenery package:

- > Close Runway 6-24
- > Added Runway 7-25 per real world specification.
- > Changed the ILS Frequency to match current approach charts
- > Replaced the original default buildings with default buildings that look like they would fit better in this environment.
- > Add a few default buildings to populate the village of Barrow.
- > Added some static aircraft.
- > Added night lighting to the ramp areas.
- > Relocated taxiway signs for new runway.

- > Extended the ramp and added more parking.
- > Expanded the airport property to accommodate new runway.
- > Remove pond adjacent to airport to accommodate new runway.
