

Canadian Rockies Int'l Airport CYXC for FS-2004

by: Scenery4Flightsims.com

This is fictional scenery for CYXC, Canadian Rockies Int'l Airport (Cranbrook, B.C.), designed for FS9. I created this scenery to make it a bit more realistic. The default scenery was pretty bare and the buildings just didn't fit.

Here is what to look for in this scenery package:

- Removed most of the default airport buildings and replaced them with more appropriate buildings.
- Reconfigured the parking spots and added additional.
- Added some taxi signs.
- Lengthened runway 16-34 to 8000 ft.
- Added night lighting to the ramp area.
- Modified ILS approach.
- Added a representation of the St. Eugene golf course/casino resort, located a few miles south of the airport on the St Mary's river.
