

Canadian Rockies Int'l Airport CYXC for FSX
by: Scenery4Flightsims.com

This is fictional scenery for CYXC, Canadian Rockies Int'l Airport (Cranbrook, B.C.), designed for FSX. I created this scenery to make it a bit more realistic. The default scenery was pretty bare and the buildings just didn't fit.

Here is what to look for in this scenery package:

- Removed most of the default airport buildings and replaced them with more appropriate buildings
- Reconfigured the parking spots and added additional
- Added some taxi signs
- Lengthened runway 16-34 to 8000 ft
- added night lighting to the ramp area
- Added the St. Mary's River
- Added a representation of the St. Eugene golf course/casino resort, located a few miles south of the airport on the St Mary's river.
