

First Flight Airport, (KFFA), North Carolina - for FSX
by: Scenery4Flightsims.com

First Flight Airport (IATA: FFA, ICAO: KFFA, FAA LID: FFA) is a public use airport located one nautical mile (2 km) west of the central business district of Kill Devil Hills, a town in Dare County, North Carolina, United States. The airport is owned by the U.S. National Park Service and is categorized it as a general aviation facility.

On December 17, 1903 the first successful powered heavier-than-air aircraft flight occurred here, conducted by the Wright brothers.

The airport itself is famous for being the site of hundreds of pre-flight gliding experiments carried out by the Wright brothers. The Wright Brothers National Memorial, located atop nearby Kill Devil Hill, is a 60-foot granite pylon paying homage to the Wright Brothers and the first sustained heavier-than-air flight. The U.S. Centennial of Flight Commission also chose the airport as one of the stops for the National Air Tour 2003.

First Flight Airport covers an area of 40 acres (16 ha) at an elevation of 13 feet (4 m) above mean sea level. It has one runway designated 2/20 with an asphalt surface measuring 3,000 by 60 feet (914 x 18 m). For the 12-month period ending August 19, 2009, the airport had 38,120 aircraft operations, an average of 104 per day: 97% general aviation, 3% air taxi, and <1% military.

Here is what to look for in this updated file:

- Rework the "Land Class" scenery on and around the airport.
- Added or re-routed major roads near the airport.
- Added moving traffic to one of the major roads
- Added all of the roads and walking paths on the airport property
- Added parking lots with cars
- I took the liberty of adding runway edge lights (the actual airport does not have any)
