

Gelena, Alaska Scenery for FSX
by: Scenery4FlightSims.com

This is fictional scenery for Gelena, Alaska, Pitka airport (PAGA), designed for FSX. I created this scenery to update the airport and surrounding area and replace several of the unrealistic looking buildings with something more appealing.

Here is what to look for in this scenery package:

- > Replaced several original default buildings with default buildings that look like they would fit better in this environment.
- > Added some static aircraft.
- > Added night lighting to the ramp areas.
- > Rearranged parking.
- > Added missing taxiways.
- > Added additional taxiway signs.
- > Added "landclass" scenery to represent the town of Gelena.
- > Fixed the default, messed up shorelines adjacent to the airport (water climbing up the banks).
