

Jonesboro Munciple Airport, Jonesboro Arkansas, U.S.A. (KJBR) for FS-2004 by: Scenery4Flightsims.com

This is fictional scenery for KJBR, Jonesboro Munciple Airport, designed for FS9. I created this scenery to make it a bit more realistic.

Jonesboro Municipal Airport (IATA: JBR, ICAO: KJBR, FAA LID: JBR) is a city-owned public-use airport located three nautical miles (6 km) east of the central business district of the City of Jonesboro, in Craighead County, Arkansas, United States. It is mostly used for general aviation and is also served by Air Choice One through the federally subsidized Essential Air Service program.

As per Federal Aviation Administration records, the airport had 1,339 passenger boardings (enplanements) in calendar year 2008, 165 enplanements in 2009, and 522 in 2010.

Jonesboro Municipal Airport covers an area of 1,000 acres (405 ha) at an elevation of 262 feet (80 m) above mean sea level. It has two asphalt paved runways: 5/23 is 6,200 by 150 feet (1,890 x 46 m) and 13/31 is 4,099 by 150 feet (1,249 x 46 m).

For the 12-month period ending June 30, 2008, the airport had 20,156 aircraft operations, an average of 55 per day: 87% general aviation, 13% air taxi, and <1% military. At that time there were 119 aircraft based at this airport: 76% single-engine, 18% multi-engine, and 6% jet.

Here is what to look for in this scenery package:

- Removed all of the default airport buildings and replaced them with more appropriate buildings
- Reconfigured the parking spots and added additional.
- Added some taxi signs
- Added night lighting to the ramp area.
- Added missing GPS approaches.
- Added missing waypoints for approaches per current charts
