

Juneau, Alaska Scenery for FS9

by: Scenery4FlightSims.com

This is fictional scenery for Juneau, Alaska (PAJN), designed for FS9. I created this scenery to fix some scenery issues and "dress up" the area.

Here is what to look for in this scenery package:

- > Major revision of airport including missing and/or improperly named taxiways.
- > Added/modified taxiway signs throughout airport.
- > Modified the landclass to remove the village on the south side of the airport.
- > Added redesigned passenger terminal.
- > Added night lighting to the ramp area.
- > Added cruise ship.
