

Kansas City International Airport - KMCI for FSX
by: Scenery4Flightsims.com

This is fictional scenery for KMCI, Kansas City International Airport, designed for FSX. I brought this airport up to date because a number of taxiways and approaches changed since FSX was developed.

Kansas City International Airport (IATA: MCI, ICAO: KMCI, FAA LID: MCI) (originally Mid-Continent International Airport) is a public airport 15 miles (24 km) northwest of downtown Kansas City in Platte County, Missouri. In 2016, 11.04 million passengers used the airport.

Its largest carriers are Southwest Airlines and Delta Air Lines, both having many daily flights in Terminal B. The airport has always been a civilian airport and has never had an Air National Guard unit assigned to it.

Here is what to look for in this scenery package:

- Added / edited taxi signs.
- Added new taxiways.
- Added night lighting to the ramp area.
- Updated GPS, ILS, approaches.
- Updated all Waypoints used for approaches.
- Added additional parking.
