

Ketchikan, Alaska Scenery for FS9

by: Scenery4FlightSims.com

This is fictional scenery for Ketchikan, Alaska (PAKT), designed for FS9. I created this scenery to fix some scenery issues and "dress up" the area.

Here is what to look for in this scenery package:

- > Added missing taxiway B and C.
- > Added taxiway signs throughout airport.
- > Modified the landclass to remove the village surrounding the airport.
- > Added buildings to the airport ramp area after deleting the unrealistic default buildings.
- > Added night lighting to the ramp area.
- > Added cruise ships.
- > Added some static aircraft.
