Prince George Airport CYXS for FSX
by: Scenery4Flightsims.com

This is fictional scenery for CYXS, Prince George Airport, B.C. Canada designed for FSX.I created this scenery to make it a bit more realistic. The default scenery was pretty bare and the buildings just didn't fit.

Prince George Airport (IATA: YXS, ICAO: CYXS) is an airport that serves Prince George, British Columbia, Canada, and the surrounding area. It is located just within the southern boundary of the city, 2.8 nautical miles (5.2 km; 3.2 mi) southeast, and is run by the Prince George Airport Authority. It is home to the fourth longest commercial runway in Canada and the 2nd longest in British Columbia. It is Canada's newest designated tech stop airport it can handle all wide body, main deck freighters and can refuel any size aircraft in less than 90 minutes. YXS can connect air to road access throughout the country in less than 24hours for western Canada and the Pacific Northwest. The Prince George Airport works with all major multinational freight forwarders.

Here is what to look for in this scenery package:

- Removed most of the default airport buildings and replaced them with more appropriate buildings
- Reconfigured the parking spots and added additional
- Added some taxi signs
- Added night lighting to the ramp area
- Added missing ILS and RNAV approaches
- Lengthened the runways according to latest airport diagram
- Realigned runway headings to match current charts
- Added the missing Fraser river
