

Salmon Lake, Alaska Scenery for FS9 (Z81)

by: Scenery4FlightSims.com

This is fictional scenery for Salmon Lake, Alaska (Z81), designed for FS9. I created this scenery as a hunting and fishing resort.

Here is what to look for in this scenery package:

- > Modified the land class to clear an area for the cabins and for the runway extension.
- > Lengthened the gravel runway from 1860 ft. to 2500 ft.
- > Built several lodges and cabins along the lakeshore.
- > Built Floatplane docks and Boat docks.
- > Added more parking.
- > Added yellow cones along length of runway.
- > Added custom Salmon Lake Resort sign.
- > Added a road into the resort from the main highway.
