

Sitka, Alaska Scenery for FSX  
by: Scenery4FlightSims.com

This is fictional scenery for Sitka, Alaska (PASI), designed for FSX. I created this scenery to clean-up the default shoreline and dress up the airport.

Here is what to look for in this scenery package:

- > Added parking spots.
- > Removed most default buildings and added buildings that seems more appropriate for this scenery.
- > Modified the shoreline to eliminate the water on the vertical banks around the airport.
- > Added night lighting to the ramp area.
- > Added taxi signs.
- > Added a cargo ramp.
