

Unalakleet, Alaska Scenery for FSX

by: Scenery4FlightSims.com

This is fictional scenery for Unalakleet, Alaska (PAUN), designed for FSX. I created this scenery to "dress up" the area, which was pretty bare and outdated.

Here is what to look for in this scenery package:

- > Asphalt paved runways per current real world airport specs.
- > Corrected the runway heading markings from 14-32 to 15-33 per real world airport specs.
- > Added narrow gravel taxiways, which may or may not be real world. Could not locate a airport diagram, so relied on Google Earth satellite image.
- > Moved the bridge crossing the river to a more realistic location.
- > Added a landclass town to represent the town of Unalakleet.
- > Added buildings to the airport ramp area.
- > Added night lighting to the ramp area.
- > Added taxiway signs.
