

Valdez, Alaska Scenery for FS9

by: Scenery4FlightSims.com

This is fictional scenery for Valdez Pioneer Airport (PAVD), Alaska , designed for FS9. I created this scenery to "dress up" the area, which was pretty bare and outdated.

Here is what to look for in this scenery package:

- > Added taxiway signs.
- > Expanded parking ramp and added parking spots.
- > Removed default terminal and added a terminal building that seems more appropriate for this scenery.
- > Remove other default buildings from the ramp and replaced with more appropriate buildings.
- > Added fence along airport boundary.
- > Added night lighting to the ramp area.
- > Added landclass scenery for the town of Valdez, approx 3 miles SW of the airport. You will fly right over Valdez on approach to runway 6.
