

Wrangell, Alaska Scenery for FS9

by: Scenery4FlightSims.com

This is fictional scenery for Wrangell, Alaska (PAWG), designed for FS9. I created this scenery to "dress up" the area, which was pretty bare and outdated.

Here is what to look for in this scenery package:

- > Added fictional taxiway "C" with signs.
- > Aligned runway 10 ILS Localizer with the runway.
- > Expanded parking ramp and added parking spots.
- > Removed default terminal and added a terminal building that seems more appropriate for this scenery.
- > Remove other default buildings from the ramp and replaced with more appropriate buildings.
- > Added fence along airport boundary.
- > Modified the shoreline to eliminate the water up on the high banks of the airport property.
- > Added night lighting to the ramp area.
- > Removed the out-of-place autogen building from the airport property.
